

Hydro Tasmania Environmental Policy

A sustainable future through responsible management

We want current and future generations to enjoy the benefits of a clean and healthy environment because we care about the environment and for the future of our communities. We operate our assets, and provide services and solutions to our clients, in a collaborative and environmentally responsible manner.

We are committed to

- leadership in environmental management and advocating for limiting adverse impacts for climate change
- a cooperative and sustainable approach to catchment management where we adapt to a changing climate
- continually improve how we carefully managing natural resources to protect and enhance natural diversity
- reduce our pollution and waste
- leadership in efficient use of energy in our business and for our customers
- a clean and healthy environment for future generations

Our compliance

We ensure our activities, products and services comply with environmental legislation as well as relevant environmental commitments and agreements. We ensure our environmental stewardship adapts to climate variability.

Our relationships

We work cooperatively with our customers, stakeholders and the community to identify and contribute to practical solutions to environmental issues. We show leadership and are open and honest in providing information about our activities. We ensure that we have processes for listening and communicating to our customers and stakeholders.

Our performance

- we implement plans and processes which support our environmental policy and strategic directions
- we consider environmental factors in our research and development, planning, new projects, investments, operations and services
- we operate our assets, and provide services and solutions to our clients, in an environmentally responsible manner ensuring responsible resource management
- we offer environmentally responsible products and services
- we ensure our staff and contractors are trained and empowered to fulfil their environmental responsibilities
- we conduct regular reviews of our environmental performance to ensure that we are meeting our objectives and targets, and make information about our environmental performance available to the public
- we ensure continual improvement of our HSE system and practices and look for opportunities to be leaders in the protection of biodiversity and ecosystems
- we stay at the forefront of scientific knowledge and understanding of environmental management and contribute to environmental research.
