

# Environmental Policy

## A sustainable future through responsible management

We want current and future generations to enjoy the benefits of a clean and healthy environment because we care about the environment and the future of our communities. We operate our assets and provide services and solutions to our customers in a collaborative and environmentally responsible manner.

### We are committed to

- Innovation and leadership in environmental management and advocating for limiting adverse impacts for climate change
- a collaborative and sustainable approach to catchment management where we adapt to a changing climate
- continually improve how we carefully manage natural resources to protect and enhance natural diversity
- the protection of the environment, prevention of pollution and reduction of waste
- innovation and leadership in efficient use of energy in our business and for our customers
- achieving a clean and healthy environment for future generations

### Our compliance

We care about the environment and ensure our activities, products and services comply with environmental legislation as well as relevant environmental commitments, compliance obligations and agreements. We ensure our environmental stewardship adapts to climate variability.

### Our relationships

We care, collaborate and work effectively with each other, our customers, stakeholders and the community to identify and contribute practical solutions to environmental issues. We show leadership and are open and honest in providing information about our activities. We ensure we have processes for listening and communicating to our customers.

### Our performance

- we implement plans and processes which support our environmental policy and strategic directions
- we consider environmental factors in our research and development, planning, new projects, investments, operations and services
- we operate our assets and provide services and solutions to our customers in an environmentally responsible manner, ensuring responsible resource management
- we offer innovative and environmentally responsible products and services
- we ensure our staff and contractors are trained and empowered to fulfil their environmental responsibilities
- we conduct regular reviews of our environmental performance to ensure we are setting and achieving our environmental objectives and targets and make information about our environmental performance available to the public
- we ensure continual improvement of our HSE system, performance and practices and look for opportunities to innovate and be leaders in the protection of biodiversity and ecosystems
- we innovate and stay at the forefront of scientific knowledge and understanding of environmental management and contribute to environmental research.
