

# Strictly Business.

*To be read in conjunction with our Disclosure Statement and General Terms.*

## **ENERGY PLAN**

### **Plan name**

Strictly Business

### **Eligibility criteria**

To be eligible for this plan:

- a) you must hold an active Australian Business Number issued by the Australian Business Register that is used in connection with your Supply Address and provide it to us; and
- b) the Supply Address must be located in Victoria, South Australia, New South Wales or the Energex distribution zone of Queensland.

### **Additional terms**

1. A payment processing fee will apply to all card payments. You can find a list of our fees and charges at [momentumenergy.com.au/fees-charges](https://momentumenergy.com.au/fees-charges). For direct debit card payments, the fee will be included in the total amount debited. For other card payments, the fee will be added to your next bill.
2. If we reasonably determine that you are not eligible for this plan (for example, you don't meet our credit eligibility criteria) or you subsequently become ineligible for this plan, we may end the Market Contract by prior written notice to you. If this happens and we're Responsible for the Supply Address, we'll continue to sell you electricity at the Standing Offer Prices relevant to the Supply Address.
3. We may vary or retire the plan, by prior written notice to you. If we vary the plan, our notice may include a link to details of the variation on our website.

## **EXTRA PRODUCT TERMS**

### **Renewable promise**

In these Extra Product Terms:

- **Hydro Tasmania** means our parent company, the Hydro-Electric Corporation (ABN 48 072 377 158);
- **RECs** means renewable energy certificates, including small-scale technology certificates and large-scale generation certificates; and
- **Renewable Energy** means energy generated from renewable resources (e.g. sunlight, wind or water).

1. We'll:

- a) ensure that Hydro Tasmania or another electricity generator will generate an equivalent amount of Renewable Energy as we bill you for in that same calendar year; and
- b) engage an external auditor to examine the reconciliation of the Renewable Energy generated against the quantity of the renewable promise.

2. You acknowledge that:

- a) the electricity supplied to the Supply Address comes from the grid and consists of energy generated from both renewable and non-renewable sources, so you won't necessarily receive Renewable Energy;
- b) the renewable promise isn't accredited by the National GreenPower Accreditation Program and the Renewable Energy referred to in clause 1(a) won't give you any rights to claim or receive RECs or any other environmental product, whether or not the Renewable Energy is eligible to produce those certificates or products;
- c) we've made no representation to you that our renewable promise will reduce the quantity of greenhouse gas emissions attributable to you at law, or achieve any other purpose, and you've relied on your own investigations, interpretations, deductions, information and determination in deciding whether the renewable promise is suitable for you;

3. We may stop offering the renewable promise as an Extra Product by at least 20 Business Days prior written notice to you. If we stop offering the renewable promise, the Market Contract will

continue unless it's also ended in line with the General Terms.

4. If you cease to be eligible for our renewable promise, these Extra Product Terms will no longer apply.

## **GreenPower**

1. In these Extra Product Terms:

- **Clean Energy Regulator** means the independent, Australian statutory authority responsible for administering legislation to reduce carbon emissions and increase the use of clean energy;
- **GreenPower Generator** means an electricity generator approved under the National GreenPower Accreditation Program that reduces greenhouse gas emissions within the electricity sector and produces net environmental benefits;
- **GreenPower Product** means a product certified under the National GreenPower Accreditation Program. It refers only to the GreenPower Percent of any Momentum product offering and may consist of one or more GreenPower Product options;
- **GreenPower Charges** means the amount payable for a GreenPower Product;
- **GreenPower Percent** means the proportion of your total usage quantity that the GreenPower Product applies to, as elected by you;
- **GreenPower Rate** means the dollar amount (cents per kilowatt hour) applicable to the GreenPower Product;
- **National GreenPower Accreditation Program** means the voluntary, government-accredited program that enables electricity retailers to purchase Renewable Energy on behalf of your household or business; and
- **Renewable Energy** means energy generated from natural resources (like sunlight, wind and water).

These Extra Product Terms:

- a) apply, if you have chosen our GreenPower Product; and
  - b) cease to apply if we are unable to continue to provide our GreenPower Product to you for any reason.
2. You must pay the GreenPower Charges in addition to

other Charges payable under this Market Contract.

3. The GreenPower Charges in a billing period are calculated by multiplying the GreenPower Percent by the total usage quantity at all relevant Supply Addresses during that billing period, and then multiplying this by the GreenPower Rate.
4. We will ensure that an equivalent amount of Renewable Energy is generated from GreenPower Generators as is purchased by you. We will fulfil this commitment through voluntarily surrendering the corresponding amount of eligible large-scale generation certificates to the Clean Energy Regulator.
5. As the energy supplied to your Supply Address under this Market Contract is sourced from the national electricity grid, you acknowledge that the energy supplied to your Supply Address will not necessarily be Renewable Energy.
6. If you no longer wish to purchase our GreenPower Product, or you would like to change your GreenPower Percent, you acknowledge that the Market Contract under which you purchased our GreenPower Product will be terminated.
7. If, after the date that you and we enter into this Market Contract, we incur any liability, cost or reduction in benefit due to or arising from a change to the National GreenPower Accreditation Program, and we reasonably determine that there is any increase in the direct or indirect cost to us of purchasing or selling energy to your Supply Address, then we may vary your Charges in accordance with your Market Contract.
